**LISTING OF CLAIMS**

**Claim 1 (currently amended):** An aromatic-based siloxane macromonomer having a formula of

wherein the R groups are the same or different; each R group comprises an aromatic group having a linking group that covalently attaches the aromatic group to a silicon atom; R<sub>1</sub> is an aromatic-based substituent or an alkyl; x is a non-negative integer; and y and z are natural numbers; and wherein an attachment of the aromatic group to the silicon atom results from a hydrosilylation of an allylic functional group on the aromatic group.

**Claim 2 (previously presented):** The macromonomer of claim 1 wherein said R groups are the same or different C<sub>6-30</sub> aromatic-based substituents.

**Claim 3 (currently amended):** An aromatic-based siloxane macromonomer having a formula of
